Loading from test_pipeline/data/subsampled_100000.h5ad

Loaded subsampled data with shape (100000, 19957)

Quality Control

Ambient RNA QC

Checking if a cleanup is necessary, flagging cells with less than 1000 counts as potential ambient RNA contamination

No significant RNA contamination detected, skipping cleanup

Count QC

index	count	mean	std	min	25%	50%	75%	max
total_counts	100000.00	3924.63	2698.54	248.00	2350.00	3424.00	4779.00	65975.00
